ENVIRONMENTAL CRUISE The Arribes del Duero Environmental Cruise travels along the spectacular vertical cliffs of the International Duero, on its borde between Zamora (Spain) and Miranda do Douro (Portugal). During the journey, the technicians from the Biological Station inter the ethnographic, fauna, flora and geological resources of the spectacular cliffs of the park. After their return, they include a tast of generous Port wines. Duration of approximately 1 hour.

The Arribes Wine Route, an association of which we are members, runs between the provinces of Salamanca and Zamora on the border with Portugal.

180 kms. of river canyons that, in contrast to the peneplain, have generated an ideal microclimate for the cultivation of vineyards.

Its border location and distance from urban centers gives it the character of an oasis in the confines of Castilla y León with views of Portugal.

A paradise sheltered between granite canyons and metamorphic rocks, also known as arribes, or arrivals, that outline the Duero River.

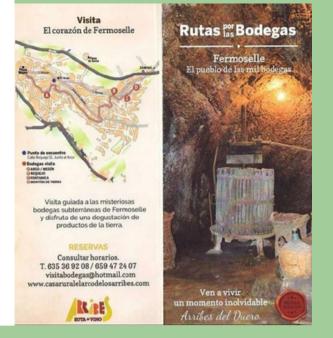

There are 43 partners on the Route, each of them offers different perspectives of the area: architecture, culture, history, gastronomy, nature,...
